Q&As

1. Is the amp cannot turn on?

The battery was dead. Please connect the adapter and check if the adapter indicator light works properly.

2. Does the U disk cannot record?

Please make sure the capacity of your U disk less than 32 GB and the format of your U disk must be FAT32.

3. Is the Bluetooth unable to connect?

Please check whether the Bluetooth is turning on. If the indicator light is always on after flashing, the Bluetooth has been connected by another device. Please disconnect it, if not please try connecting it using another device.

4. Is the battery malfunction?

If the amp runs out of battery for a long time, the batteries will be damaged. The batteries can be changed, but you have to ask a professional to do it. (The amp can use for 5-10 hours after fully charged.)

5. Is there no sound coming out from the amp?

Please make sure the main volume and the gain are turned up, then check whether the adapter and the battery work normally.

6. Is there a loud white noise from the amp?

Please disconnect all of the equipment, including the musical instruments and adapter. If the issue can't be solved, please contact the seller.
