

POWER: This jack should use a 9V effect adapter (internal negative external positive) to power the effect.

FUNCTION DESCRIPTION: These six wave switches are used to adjust the corresponding audio frequency bands (100, 200, 400, 800, 1.5K, 3K). The upward fluctuation is the effect of enhancing the corresponding frequency band, and the downward fluctuation is the effect of weakening the corresponding frequency band.

OUTPUT: Use a 1/4" (6.35mm) audio cable to connect a playback device such as a amplifier.

INPUT: Use a 1/4" (6.35mm) audio cable to connect a musical instrument such as electric guitar or electric bass.
